

**Aprilaire 600  
Whole-House Humidifier**

**DO YOU:**

- Want to be more comfortable?
- Have allergies?
- Have a dry and scratchy throat?
- Have itchy skin?
- Want to take better care of your floors, cabinets, and instruments?

**REASONS TO BUY:**

- The Aprilaire Model 600 Humidifier is a whole-house solution that helps you achieve total comfort through humidity control
- Coverage up to 4,000 square feet
- Has outdoor sensor that automatically adjusts humidity levels

**Aprilaire 800  
Steam Humidifier**

**DO YOU:**

- Suffer from respiratory infections?
- Suffer from allergies and/or asthma?
- Want to be more comfortable?
- Have a dry and scratchy throat?
- Have itchy skin?
- Care about overall skin care?
- Want to take better care of your floors, cabinets, and instruments?

**REASONS TO BUY:**

- Full coverage up to 6,200 square feet
- Ideal for homes in arid, desert climates
- No white film or dust is left behind
- Continually monitors and responds to outdoor temperatures and indoor relative humidity
- Convenient digital control

**iWave-R**

**DO YOU:**

- Worry about the spread of colds and viruses?
- Want to have cleaner air in your home?
- Have foul odors in your home?
- Suffer from respiratory illness such as asthma and/or emphysema?
- Have stale, stuffy air in your home?

**REASONS TO BUY:**

- Kills viruses, bacteria, and molds
- No maintenance
- Self-cleaning
- Flexible design with no replacement parts

**Aprilaire Electrostatic  
Air Purifier**

Model 5000

**DO YOU:**

- Have pets?
- Have dust build-up in your home?
- Suffer from allergies and/or asthma?
- Worry about air pollutants?

**REASONS TO BUY:**

- Removes pet dander and respirable dust, which can trigger asthma
- Traps airborne pollen, mold, and spore-sized particles
- Eliminates airborne viruses and bacteria-sized particles and fungi
- Captures airborne particles the size of tobacco smoke and smog
- Easy to maintain, silent operation

**Aprilaire Air Purifier**

Model 1610

**DO YOU:**

- Worry about the quality of the air in your home?
- Suffer from allergies and/or asthma?
- Have limited space for installation?
- Want to protect your HVAC system?

**REASONS TO BUY:**

- Helps keep you and your family comfortable and healthy
- Traps dust and damaging particulates
- 9 times the filtration area of regular 1 inch filters
- Easier installation; requires less space
- Protects your HVAC system

With our **Annual Maintenance Plan (AMP)**, your furnace and air conditioning systems receive routine servicing that can prevent emergency breakdowns, keep warranties valid, increase energy efficiency and help save money in the process!

- **Current AMP members receive up to 10% off many repairs.**
- Our AMP includes two annual maintenance visits per system: cooling (Spring) and heating (Fall) for **\$249/year** (savings of \$49). Additional systems are available for **\$225/year**.

## Service and Safety Inspections

### Air Conditioning

- Adjust/program thermostat for current season
- Basic cleaning of condenser coil (additional charges for difficult cleaning or acid wash)
- Inspect and change standard-size filters (16 x 25 x 1 or 20 x 25 x 1)
- Check leveling of condensing unit (additional charge if leveling is needed)
- Clean and inspect condensation drain lines and fittings
- Vacuum blower compartment
- Inspect and test electrical connections
- Inspect capacitors and contactor
- Run test controls, switches, relays, transformers, contactors, motors, and fans
- Measure starting and running amps, line voltage, and control voltage
- Check airflow and air delivery
- Digitally monitor refrigerant pressures and temperatures
- Digitally measure superheat and/or subcooling
- Check for proper clearance surrounding air conditioning equipment
- Report on overall air conditioning system condition
- Make system recommendations
- Answer client questions

### Furnace

- Program digital thermostat for current season
- Inspect and change standard-size filter (16 x 25 x 1 or 20 x 25 x 1)
- Check heat exchanger if visible
- Test for presence of carbon monoxide
- Check blower motor amp draw and operation
- Inspect blower wheel
- Clean burners and burner compartment
- Check electrical connections
- Test safety controls operation
- Check gas pressure and adjust if needed
- Cycle gas valve and check performance
- Check ohmmeter to test hot surface igniter
- Check capacitor
- Look for presence of proper combustion air
- Clean and inspect flame-proving sensor
- Inspect temperature rise
- Inspect visible flue piping
- Test for combustible gas leaks near furnace
- Inspect all drain lines in high-efficiency units
- Clear condensate traps on high-efficiency units
- Report on overall furnace system condition
- Make system recommendations
- Answer client questions

### Additional Services Available at Time of Maintenance Appointments:

- Humidifier checkup and water panel replacement
  - Adjust and clean blower motor and fan assembly
  - Inspect evaporator coil and drain pan
  - Clean electronic air cleaner
  - Replace media filters
- (must order prior to appointment—prices vary by size)
